What exactly is Montessori?

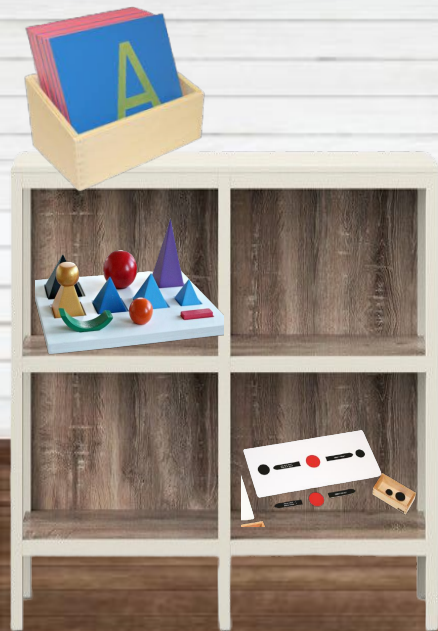

"Free the child's potential, and you will transform him into the world." - Maria Montessori

The Montessori Method of Education, developed by Italian physician Maria Montessori, is a child-centered educational approach based on the scientific observations of children and how they learn best.

In Montessori classrooms, class activities are hands on. Materials are elegantly prepared and made for exploration and discovery. We strive to provide a safe environment, where the atmosphere is one of respect for one's self, others, and the environment.
